

OBJECT

The object of the game is to earn money by spinning the wheel and solving word puzzles on the puzzle board. The player with the most money after four rounds is the winner.

CONTENTS

- 1 Plastic Puzzle Board
- 30 Plastic Letter Covers
- 2 Plastic Legs
- 1 Set Background
- 1 Backing Board
- 25 Puzzle Sheets with 100 Puzzles
- 10 Free Play Tokens
- 75 Play Money Bills
- 1 Wipe-Off Used Letter Chart
- 1 Wipe-Off Marker
- 1 Wheel of Fortune® Spinner Card and Spinner

NOTE: The spinner will be referred to as the "Wheel" throughout these instructions.

- 1 Booklet Containing Rules, Letter Frequency and Puzzle Solutions

NOTE: Avoid looking at the Letter Frequency and Puzzle Solutions sections in this booklet until necessary.

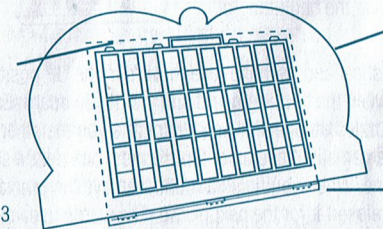

SET UP

1. To assemble the Wheel, separate the plastic spinner from the collar, then remove and discard the plastic nib. Press the collar completely onto the spinner card from the bottom side. Snap the spinner into the top of the collar. The Wheel is divided into 24 spaces made up of various dollar amounts and special spaces. (Ex.: Lose a Turn, Bankrupt and Free Play.)

2. To assemble the puzzle board, locate the plastic puzzle board frame, the 30 plastic letter covers and the 2 plastic legs. Carefully insert one end of a cover into the center slot of each space of the puzzle board frame so that the two tabs slide easily into the track (see illus. 1). Continue to slide the cover down gently so that the other end slips into place (see illus. 2). If a cover does not fit securely, try another in its place.

Gently Insert
Behind Tabs

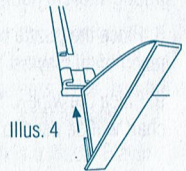

Wheel of Fortune
Set Display

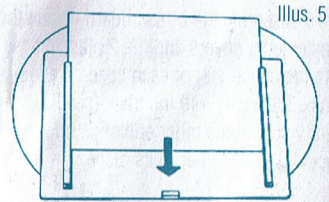

Gently Snap Tabs on
bottom of Set Display
into slots on Puzzle
Frame

3. After all the covers have been inserted into the puzzle board frame, gently insert the Wheel of Fortune® set background behind the four tabs bordering the front top of the puzzle board frame, then snap the three tabs along the bottom edge of set background into the slots on lower edge of puzzle frame (see illus. 3).

4. Turn the puzzle board frame over and, from the bottom, slide each leg into place (see illus. 4).

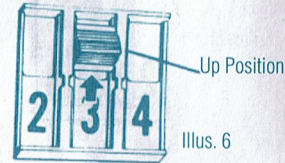

5. Take the backing board provided and insert it in between the slots on the back of the puzzle board frame (see illus. 5). This board will conceal the puzzles on the back of the puzzle sheet being used during each game. It remains part of your puzzle board and should not be removed.

Illus. 5

6. Make sure that all letter covers are slid into their UP position. This will prevent accidentally revealing the puzzle to the players (see illus. 6). Letter covers should be in the UP position at the beginning of each new round.

Illus. 6

7. Select any puzzle sheet and, with the letter covers in the UP position, slide the puzzle sheet between the backing board and the puzzle board. Each puzzle sheet features two puzzles on one side and two puzzles on the other side, four puzzles total. Since a game is made up of four rounds, one puzzle sheet may be used for each game. When you finish a round, remove the puzzle sheet, turn it upside down and reinsert it for the next puzzle. The words in each puzzle are surrounded by random letters to make it difficult to see the answer when the puzzle sheet is not in the puzzle board.

8. Place the puzzle board on a level surface and place the Wheel within easy reach of all players.

9. Place the wipe-off letter chart and wipe-off marker on the table. The letter chart will be used to keep track of which letters have been called.

PLAYING THE GAME

Select one player to be the Banker. S/he will distribute money as players correctly identify letters in the puzzle.

Select one player to be the Host. S/he will check the letter frequency charts in this booklet to see if specific letters appear in each puzzle and under what window(s) they are located. The host also marks off the letters on the letter chart as they are used.

All players should note the following information on the puzzle sheet being used:

- **Puzzle Type:** this can be a Title, Place, Thing, Event, etc.
- **Puzzle Number:** the host will use this number to check letters in the letter frequency charts.
- **Blue Spaces:** the blue spaces below the sliding covers tell you which windows have letters to the puzzle. All other spaces may be ignored.

To determine which player goes first, all players spin the Wheel and the player who spins the highest dollar amount goes first. Play then proceeds to the left.

The first player spins the Wheel. The spinner must make at least one complete spin around the Wheel. If the spinner stops on a dollar amount, the first player can ask for a letter he or she thinks may be in the puzzle. This letter must be a consonant (vowels may only be purchased).

The host turns to the letter on the frequency chart and looks for the corresponding puzzle number. The host reads off any position numbers that might be next to it. The Puzzle Board squares corresponding to those numbers are uncovered (slide cover DOWN) to reveal the selected letter in the puzzle. If the letter selected by the player is in the puzzle, the player receives the dollar amount spun on the Wheel from the banker. If the letter appears more than once, the dollar amount is multiplied by the number of times the letter appears.

For example, players are trying to solve puzzle #56, which is a Place. Player One spins the Wheel and the spinner stops on \$900. Player One asks "Is there

a T?". The host flips to the frequency chart that corresponds to the letter T and looks next to #56. What s/he sees is "9, 17" This means that the Letter T appears twice in the puzzle at positions 9 and 17 on the Puzzle Board. Those squares are uncovered and Player One receives \$1, 800 from the banker - \$900 for each appearance of the letter T. The "Host" then marks off the letter T on the Used Letter Chart using the marker.

During his or her turn, the player continues to spin and ask for letters until s/he:

- asks for a letter not in the puzzle,
- asks for a letter already revealed in the puzzle,
- spins Lose A Turn or Bankrupt on the Wheel,
- asks for a vowel without purchasing it,
- purchases a vowel not in the puzzle,
- makes an incorrect guess as to the solution of the puzzle.

When any of the above happens, the player's turn ends and the next player goes.

After the first player takes his or her first spin, all players may choose one of the following:

*Spin the Wheel *Buy a Vowel *Solve the puzzle

In general, when the Wheel is spun a letter is asked for and, if the letter appears in the puzzle, dollars are awarded to the player. The only exceptions to this rule occurs when a player spins Lose A Turn, Bankrupt or Free Play.

Lose A Turn: If a player spins Lose A Turn, s/he ends that turn and forfeits the next turn.

Bankrupt: If a player spins Bankrupt, s/he ends his or her turn and returns to the "Banker" any money won so far during the round.

Free Play: When a player spins Free Play, s/he takes a Free Play token and continues the turn. Free Play tokens give players immunity. If a player selects a letter not in the puzzle, spins Lose A Turn or spins Bankrupt, s/he may use a

Free Play token on that same turn to continue playing. However, Bankrupt still results in a player losing any money won during the round. A player should announce his or her intention to use a Free Play Token to the other players before actually doing so.

Buying a Vowel

A player may buy a vowel during his or her turn if s/he has at least \$250. This amount is paid to the banker before the host checks to see if the vowel appears in the puzzle. If the vowel does appear, the player continues. If the vowel does not appear, the player ends his/her turn. The \$250 is paid regardless of whether or not the vowel actually appears in the puzzle. In the case of multiple appearances of the vowel, the player does not have to pay the "Banker" any more money than the initial \$250.

Solving the Puzzle

Many players will continue to ask for letters even after the answer to the puzzle becomes obvious so that they can win money before solving. A player should announce his or her intention to solve the puzzle to the other players before actually doing so.

After a player gives his or her solution to the puzzle, only that player should check the WHEEL OF FORTUNE solutions that appear in the back of this booklet. The player should locate the number of the puzzle and quickly glance at the correct solution.

If the player's solution is correct in every detail the player wins and the round is over. All the squares above black spaces are uncovered to reveal the complete word puzzle.

If the player's solution does not match exactly the solution on the page, that player is out of the round. The round continues with the other players until a player solves the puzzle.

When the round ends, only the player who has solved the puzzle keeps his/her winnings. All other players return any money won during the round to the banker. Players may keep their Free Play tokens until the game is over. Players do not have to return any money won from previous rounds.

WINNING THE GAME

After four rounds, the player with the most money is declared the winner.

ADDITIONAL RULES

If a player wins a round with less than \$500 in his or her possession, the Banker awards the player the difference (brings the player's winnings up to \$500).

Any extra word or words added to the puzzle will not be accepted and the player will be disqualified.

If a player begins to solve the puzzle and makes an error, the player must correct the error and solve the puzzle correctly. This correction must be made before the entire answer is given.
